

## *Celebrating 50 Years*

“I saw an opportunity and took a risk, starting with a couple trucks, a lot of debt and way too much confidence. I called the company *KINDERSLEY TRANSPORT LTD.*”

**Passion. Determination. Drive.**

### **Humble Beginnings...**

As a teenager, working alongside his brothers and his father, in their family business, Erwen Siemens decided to strike out on his own, establishing operations with a single truck and seven employees. Since founding Kindersley Transport Ltd. in 1962, Erwen has grown the operation into an international family business. Presently consisting of 9 companies, Siemens Transportation Group Inc. is one of Canada's most respected carriers.

### **Prairie Pride**

Half a century later, the Company has stayed true to its values, and maintained its prairie roots along the way. The thought of moving out of Saskatoon to a bigger city was out of the question. Instead of relocating the head office, branches were set up in other regions and current technology was utilized to monitor developments.

### **Sharing Success**

Mr. Siemens believes that your employees will determine your success. “I have been fortunate to have talented and dedicated staff working alongside me.” It's not just business; it's about family. “We are all proud of our company and you have that sense of ownership with family members involved. We share in our success as well as our commitment to excellence.”

### **Still Going Strong**

With 50 years in the business, Siemens Transportation Group Inc. has grown to over 1600 employees and more than 2600 pieces of equipment. Still today, it remains the family business it started as.

Every day, Erwen works alongside his four sons - Doug, Darrell, Terry and Tom - who all play prominent roles in the Company.

“Most people see the trucking industry as trucks, diesel and warehouses. I believe the trucking industry is all about people and relationships.”

*Thank You* to all of our suppliers, customers and employees who have been a part of our success.
